Page priority map · v3

Four modules, fee calculation separate. Source systems: Trace One Devex (specs) and Snowflake (sales, master data), assumed. N-tags show which client need each item serves.

P1 Must have: in the 2-week demo · P2 Needed for MVP launch · P3 After MVP · NEW Page added for client needs

N1 Global visibility of EPR costs · N2 Accurate, trusted calculations · N3 Forecasting and scenario planning · N4 Packaging cost hotspots · N5 Data quality identification · N6 Corrections back into source systems · N7 Value vs building in-house

Set up

Sign In

- P1 Email + password login (mocked in demo)
- P1 Company SSO button (Microsoft, Google, SAML)
- P2 MFA code step
- P2 Forgot password / magic link
- P3 Active sessions and devices

Onboarding

- P1 Company and legal entities
- P1 Sectors and product categories
- P1 Markets: 12+ countries and US states — N1
- P1 Laws switched on, with the reason for each
- P1 Connect Trace One Devex and Snowflake (mocked); Excel fallback — N6
- P2 Invite team members and roles
- P2 Invite suppliers (bulk upload)

Home Dashboard

- P1 Global EPR cost by market, one currency — N1
- P1 Confidence per number (± €) — N2 N5
- P1 KPI tiles: cost, uncertainty, % complete, next deadline — N1 N5
- P1 Fee impact on every tile, plus compliance status — N1
- P1 Sync status and new gaps since last sync — N5
- P2 Hotspot and forecast teasers — N3 N4
- P3 Regulatory change feed

Module 1 - Data Collection

missing or wrong: chase and resend

Templates

- P1 Pick the case: category, format, market, who answers
- P1 Auto-assembled field list with its source layer
- P1 Cost-driving fields flagged and asked first — N5
- P1 Prefill from Devex specs and Snowflake — N6
- P2 Preview as Excel and as portal form
- P2 Language choice
- P3 Client-specific custom fields

Request Data

- P1 Pick suppliers and products
- P1 One grouped request per contact
- P1 Requests sorted by € at risk — N5
- P1 Due date and reminder cadence
- P2 Escalation to the client's buyer
- P2 Status timeline per request
- P3 Multi-language emails

Supplier Data Input Portal

- P1 Magic-link access, no account needed
- P1 Only questions for their own components
- P1 Form with units and help text
- P1 Upload specs and certificates
- P2 AI pre-fill from uploaded PDFs
- P2 E-signed declaration
- P3 Inbox across several customers

Data Validation

- P1 Checks run automatically on every sync — N5
- P1 Issues ranked by € impact — N5
- P1 Devex / Snowflake vs supplier mismatch flags — N5 N6
- P1 Unit, range, sum-of-parts and sales vs shipment checks — N5
- P1 Send back to owner (loop to Request Data)
- P2 Evidence present and in date
- P2 AI-suggested fix for each issue — N5 N6

Corrections to Source NEW

- P1 Queue: source value vs verified value, per system — N6
- P1 Devex: raise spec change request (mocked) — N6
- P1 Snowflake: write to client-owned corrections table (mocked) — N6
- P1 Evidence, € effect and audit trail per change — N2 N5
- P2 Live Devex and Snowflake connectors — N6
- P2 Notify upstream owner when Snowflake is not the source — N6
- P3 Bulk corrections

Data Confirmation Screen

- P1 Completeness summary per law
- P1 Uncertainty before vs after (± €) — N2 N5
- P1 Four-eyes review status
- P1 Approve and lock snapshot
- P2 Changes vs last period
- P2 Approver, date and comment recorded
- P3 Download snapshot pack

confirmed data feeds Modules 2 and 4

Module 2 - Compliance: EPR/PPWR/SB54 as plugins

Producer Check

- P1 Matrix: product × market → obligated party
- P1 Rule that decided it, in plain words — N2
- P1 Registration status per market
- P2 Missing authorised representative flags
- P2 Sales route / Incoterm what-if
- P3 Threshold tests (small vs large producer)

Apply Rules

- P1 One plugin per law: UK, EU + national, US
- P1 Rating per component (UK RAM R/A/G)
- P1 Tonnage by material, household vs commercial
- P2 Rule version and effective date shown — N2
- P2 "Why this result" trace — N2
- P3 Exemptions and sector carve-outs

Report Generation (RPD, DoC etc)

- P1 UK RPD file
- P1 PPWR Declaration of Conformity
- P1 Preview with validation result — N2
- P2 National declarations (ES, DK, DE ...)
- P2 SB 54 PRO report
- P2 Approval and submission receipt
- P3 Audit pack export — N2

ratings and tonnage feed fee calculation

Module 3 - Fee Calculation

Fee Calculations

- P1 Estimate per scheme and market — N1
- P1 Global roll-up in one currency, dated FX — N1
- P1 Calculation trace: tonnage × tariff × modulation, with sources — N2
- P1 Tariff version shown on every number — N2
- P2 Modulation premium or discount
- P2 Year-on-year comparison — N1
- P3 Invoice reconciliation — N2

Cost Hotspots NEW

- P1 Top components, materials, SKUs by cost — N4
- P1 Cost per 1,000 units by SKU and market — N4
- P1 Drill into component, rating and trace — N2 N4
- P2 Views by brand, business unit, market — N4
- P2 Export
- P3 Portfolio trend over years — N4

Forecast & Scenarios NEW

- P1 Forecast to 2030 with known rule changes — N3
- P1 Volume plan as input — N3
- P1 Scenario: swap material or format, all markets — N3
- P1 Net of packaging cost change — N3 N7
- P2 Compare scenarios side by side — N3
- P2 Export to budget (Excel) — N3
- P3 Uncertainty ranges on forecast

Recommendations

- P1 Ranked actions with € saving a year — N4 N7
- P1 Each opens as a scenario — N3
- P2 Gaps to fix before each deadline — N5
- P2 Upcoming rule changes per SKU — N3
- P3 Alternative materials and suppliers

Value Tracker NEW

- P1 Savings identified — N7
- P1 Uncertainty removed (± €) — N2 N7
- P1 Errors fixed at source — N6 N7
- P1 Buy vs build in-house comparison — N7
- P2 Team hours saved per cycle — N7
- P3 Exportable value report — N7

Module 4 - DPP as plugin (runs in parallel with Modules 2 and 3)

Product Groups

- P1 Which products need a passport, under which law
- P1 Obligation start date per group
- P2 Granularity: model, batch or item
- P3 New groups added as EU acts land

Fill Passports / Auto generate data

- P1 Field list for that law
- P1 Auto-filled from Module 1, % filled
- P1 Source shown per field
- P2 Missing fields → request data in Module 1
- P2 Who can see each field
- P3 Live data feeds (e.g. battery health)

Validate

- P1 Required fields complete
- P1 Evidence and certificates present
- P2 Identifier and QR checks
- P2 Reviewer sign-off
- P3 Standards conformity checks

Generate passport / Publish

- P1 Public passport view on a phone
- P1 QR code / data carrier
- P1 Publish and EU registry status
- P2 Preview per audience (public, repairer, authority)
- P2 Version history and updates
- P3 Backup copy and handover export
